A Level Economics

Sixth Form study options

A Level Economics

Why study Economics?

Economics is a long-standing and popular subject in the Sixth Form. It has a very high retention rate between Years 12 and 13 and many students have gone on to study Economics or a related subject at university. The Edexcel board is studied and has been for many years. The aim of this booklet is to introduce you to the subject, provide an outline of the course and ensure that, if you opt for it, you will be aware of what you will be expecting in Years 12 and 13.

Recent Economics students have gone on to study Economics, Mathematics, Chemistry, Engineering, Politics, Business Studies, History and Management.

In the department is Mr Mike Gallacher, who has been Head of Economics since 1993, and Mr Paul Thomas.

October 2017

Economics is highly relevant for those students who want to understand how scarce resources are allocated. It provides the chance to look at microeconomic issues on a small scale, such as housing, education, health and the environment. Students will also have the chance to study macroeconomics aspects of the workings of the UK economy, including issues such as unemployment and public finances in the aftermath of Brexit and Covid-19. Students will also study Development Economics, looking at the economies of developing countries.

As a subject, Economics goes very well with Politics, Mathematics, Geography, Religious Studies and Psychology, though students opt for a wide range of subjects in combination with Economics. Students do not need to be mathematical to study Economics at A Level, though, they often are! Anyone who wants to study Economics at university level though is strongly advised to study Mathematics A Level and even Further Mathematics for certain courses in Economics.

What skills will I learn on the course?

The general skills you will learn from the course include:

- Knowledge and understanding of economic principles, theories and concepts of the economic processes at work in the UK, European Union and international contexts.
- The ability to identify appropriate economic principles, theories and concepts in order to carry out economic analysis.
- The ability to select and apply economic principles, theories and concepts relevant to economic problems.
- The ability to interpret data and to evaluate alternative economic arguments in order to draw valid conclusions.
- The ability to examine a variety of materials appropriate to an economic issue, and organise and present findings in an appropriate manner.

What kind of student does this course suit?

This course will be of interest to you if:

- You want to find out about markets and how they work.
- You are interested in real world issues, such as health, transport and the economies of developing countries.
- You want to find out how the economy works with issues such as interest rates, exchange rates and oil prices.
- You are numerate and enjoy interpreting graphs as well as prose data.
- You want the chance to study a new subject. Economics gives you that chance.

October 2018

Students are encouraged to read a quality newspaper, especially the business section, from one of The Times, The Financial Times (which is free at school on-line), The Guardian, The Independent (on-line) and the Telegraph. On a Sunday, The Sunday Times, and The Observer are worth reading and there are many quality television and radio programmes that are worthwhile. These include, subject to changes in programming:

Television:	
Panorama	BBC
Dispatches	Channel 4
Question Time	BBC 1, 10.45pm Thursday
Newsnight	BBC 2, 10.30pm weekdays
Channel 4 News	Channel 4, 7pm
Dragons' Den	BBC

Radio:	
The Today Programme	BBC Radio 4, weekday mornings
Any Questions	BBC Radio 4, Friday 7pm/ Saturday 1pm

What topics are studied?

Year 12 includes the following topics:

- Demand and Supply
- Health
- Education
- Environment
- Inflation
- Unemployment
- Economic Growth
- Balance of Payments
- Economic Development

Year 13 includes the following topics:

- Growth of Firms
- Advertising
- Cartels
- Labour Markets
- Exchange Rates
- Balance of Payments
- Financial Markets
- Government Spending and Taxation

Planned Economics visits abroad for 2022 onwards

Economics, Psychology and Politics trip to Prague: October 2023.

This trip is for current Years 8, 9, 10 and 11. It is desirable, but not essential, that the students are or are planning to study Economics, Psychology and/or Politics. This trip should include Economics-related visits to the following:

Skoda Car Plant	(Prague)
Economics Lecture	(Prague)
Czech Invest	(Prague)
Glass Factory	(Karlovy Vary)

This will also include planned Politics and Psychology visits to the Czech Parliament, the Museum of Communism, the Terezin concentration camp and the Lidice Memorial. We also plan to have a river cruise and dinner, a mystery activity, a day trip to Karlovy Vary and attend an ice hockey game.

Economics, Psychology and Politics trip to New York and Washington DC: October 2024 (to be confirmed).

This trip is for current Years 10 and 11 and includes planned Economics visits to:

Meet the Finance Professional	(New York)
Hersheys Chocolate World	(Hershey, Pennsylvania)
World Bank	(Washington DC)
Business talk	(Washington DC)
United Nations talk on development	(New York)

This will also include planned Politics and Psychology-related visits to the United Nations, the 9/11 Memorial, the White House, the Capitol Building (which has the US House of Representatives and the Senate), the US Supreme Court, Pentagon, Arlington Cemetery, the Holocaust Museum, a lecture on terrorism and a lecture on Psychology. We also plan to see a Broadway show, a boat cruise around Manhattan, and take advantage of sightseeing opportunities in both cities.

Enrichment

Our A Level Economists have organised fantastic student-led and run conferences involving leading academics, on topics such as the environment. Last year, they delivered one in conjunction with the Textiles Department on Sustainable Fashion, as well as one on Development with the Geography Department. This term there will be conferences on Current Economic Theory and also Business Economics.

Students have also entered several essay competitions and written Economics blogs and are writing an Economics magazine.

Quotes from former students

"Economics lessons have been the best."

A former student studying Geography at Cambridge

"Every lesson has been a joy. There are many things I will miss about Oxford High, but Economics is top of the list."

A former student studying Economics at Nottingham University

"I was never really good at anything until you taught me and I wanted to thank you for all your help."

A former student studying Economics at Cambridge

"Thank you for getting me really excited about a subject which I hope to use in my future career. You have been such an inspirational teacher."
